We are responsible for the environmental impact which is caused by our business. Therefore we take into consideration the environmental aspects while working and developing our business.

All of our purchases are valued from an environmental perspective. When it is financially viable and possible we choose the products or services that cause the least amount of environmental impact.

We are convinced that an increased awareness among our employees, clients and suppliers will strengthen our opportunities to pursue a long-term work for the environment, which also will improve constantly as a part of the daily business.

## **We take environmental responsibility by:**

Follow current legislation and demands that are related to our business

Use of fuel-efficient vehicles and by apply an economic driving method

Take care of and reduce our waste

Use IT-system and other technology for business efficiency and reduce any waste of resources

Raise awareness among our employees and clients, together with make demands for our suppliers

Continually measure our environmental impact, our environmental errors and work towards our set of environmental goals

Economize with our resources
